

SIMULATOR SPECIALISTS

“

My TruGolf simulator is an incredible practice tool for me, particularly during the winter months in Utah. The realism and variety of golf courses, combined with its impressive technology make for a premium playing experience. As a PGA TOUR player, it's rare that you can shape shots in an indoor practice setting, but my simulator makes that possible through accurate and reliable feedback

“

As a former PGA Tour player and now coach, to PGA Tour players, I've been able to use most simulators on the market. Using my TruGolf simulator, I not only love the accuracy of the ball flight, but the short game is night and day different from other companies. If I have a 4-foot putt, I hit a 4-foot putt. The accuracy is second to none.

WHO we are

SS is a team of avid golf enthusiasts that have mastered the craft of designing, fabricating, and building custom golf simulators for over two decades.

Our experience, through, a culmination of superior white glove customer service, creative imagination, passionate building, and masterful installation are what separates us from the pack.

If you can dream it, we can build it!

Experience is Everything

Our extensive background in golf simulation started with years of intensive training, product knowledge, professional installation, and hard work at Full Swing Golf. We continued to develop our skill sets by joining with TruGolf, another industry leader in golf simulation software technology.

Combining our experience between these two golf powerhouses enabled us to create a company that offers a perfect blend of design, custom craftsmanship, and technology.

APOGEE

The APOGEE CONTROL CENTER (ACC) gives users the most advanced and user-friendly device management tools available on the market.

MEASURED BALL AND CLUB DATA, FAST.

APOGEE is a Golf Launch Monitor that measures Ball and Club data. Built with a new array of vision algorithms called INSTANT IMPACT, the system does not require specialty balls or marked clubs.

INSTANT IMPACT and APOGEE's onboard processors provide a lag-free game play experience, erasing any gap between ball-strike and simulated flight.

View, re-view, scrutinize, and brag about every shot with APOGEE's Point-of-Impact interface. The POI provides a slow-motion, scrub-able video playback of your club's action through the ball.
